## 2014 SRT Viper TA Created for the True Track Enthusiast

- Viper TA (Time Attack) Special Edition spec-package offers track enthusiasts a turn-key track set-up
- SRT brand offers Viper TA in three exclusive, limited-edition colors - 93 units in special "TA Orange" exterior paint color, 33 units will be built in Venom Black and 33 in Bright White
- TA will begin to arrive at dealerships in the fourth quarter of 2013

November 22, 2013, Auburn Hills, Mich. - Posting a fast lap time on a road course requires a combination of driver skill and a properly balanced high-performance machine. The Chrysler Group's SRT ( [Street and Racing Technology](#)) team delivers half that equation with the 2014 SRT Viper TA (Time Attack).

The street-legal SRT Viper TA is specifically built for the performance enthusiast driver who likes to exercise their machines at the more than 150 road-race courses around North America.

Based on the SRT model, the lightest Viper in the lineup, the TA Special Edition Package builds upon the vehicle's ultra-low center of gravity, 50/50 weight distribution and largest contact patch in the production car world. The Viper TA uses chassis parts developed specifically by the SRT chassis dynamics team to attain the most out of the race-car-like chassis and create the most confidence inspiring Viper ever. SRT developed new spring rates, dampers, sway bars and brake components, combined as a system with the Viper's available Advanced Aerodynamics Package, to create one of the most track-capable production cars in the world. The changes keep the SRT Viper TA glued to the track, while the brake system is enhanced for improved balance and to resist thermal saturation during track work.

"The new 2014 SRT Viper TA is engineered for the serious performance enthusiast who needs a car that can be driven daily yet has mind-boggling limits on a road course that would rival many track-only cars. As one of the best handling and fastest supercars available on the market today, the TA enables our customers to take their passion for high performance driving to the next level," said [Ralph Gilles](#), President and CEO — SRT Brand, Chrysler Group LLC. "The SRT engineering team set out to create a world-class supercar that has few competitors on the track or the road at any price."

Key high-performance equipment for the 2014 SRT Viper TA Special Edition includes:

- Unique race-tuned calibration for the two-mode Bilstein DampTronic suspension system, retuned springs, shocks and road-racing derived sway bars offer firmer levels of damping and a smaller spread between modes than what is found on the Viper GTS
- Lighter, carbon fiber structural X-brace replaces the standard aluminum brace under the hood and ties the four corners of the engine compartment together, contributing to the 50-percent increase in torsional rigidity and stiffness across the Viper lineup
- New Brembo two-piece, 32-millimeters wide, high-thermal capacity rotors and pads that optimize heat dissipation providing improved extreme use
- Advanced Aerodynamics Package includes carbon fiber front splitters and rear spoiler to boost downforce at higher speeds – up to a 700-percent increase at 150 mph

Standard Pirelli P Zero Corsa tires are mounted on ultra-lightweight, multi-spoke Sidewinder II wheels. The brake calipers feature a black anodized finish with the Viper logo shown in TA Orange.

A carbon fiber rear applique accentuates the rear width proportions and adds another level of detail.

Under the hood of the 2014 SRT Viper TA is the handcrafted, all-aluminum 8.4-liter, mid-front V-10 overhead-valve

engine. Performance ratings are 640 horsepower and 600 lb.-ft. of torque – the most torque of any naturally aspirated sports-car engine in the world.

Inside, the performance driver-oriented cabin of the 2014 SRT Viper TA uses the same standard premium ballistic fabric racing seats from Sabelt, featuring a lightweight fiberglass shell created by a state-of-the-art resin transfer molding technology for mass reduction and long-term durability. Both driver and passenger seats can also accommodate a 3- or 6-point harness for racing belts.

The standard black interior combination includes unique orange accent stitching on the cloth seats, instrument panel (through the cowl), center stack, console, pull brake, shifter boot, shifter head, steering wheel and upper doors.

Curb weight is 3,390 pounds.

Production of the 2014 SRT Viper TA is underway at the [Conner Avenue Assembly Plant](#) in Detroit. Vehicles will begin to arrive at dealerships in the fourth quarter of 2013.

#### **About SRT Brand**

The SRT (Street and Racing Technology) brand uses a successful product development formula featuring five proven hallmarks: awe-inspiring powertrains; outstanding ride, handling and capability; benchmark braking; aggressive and functional exteriors and race-inspired and high-performance interiors to remain true to its performance roots.

The 2014 SRT lineup features five vehicles that are world-class performance contenders and bring the latest in safety technologies and creature comforts. The Chrysler 300 SRT, Dodge Challenger SRT, Dodge Charger SRT and Jeep Grand Cherokee SRT join the flagship SRT Viper, which made its highly anticipated return to the high-performance sports car market in 2013.
