FCA US Files for Diesel Vehicle Certification

May 19, 2017, Auburn Hills, Mich. - FCA US announced today it has formally filed an application for diesel vehicle emissions certification with the U.S. Environmental Protection Agency (EPA) and the California Air Resources Board (CARB) for its 2017 model-year (MY) Jeep® Grand Cherokee and Ram 1500 diesel vehicles. These vehicles feature updated emissions software calibrations.

The filing is the result of many months of close collaboration between FCA US and EPA and CARB, including extensive testing of the vehicles, to clarify issues related to the Company's emissions control technology. With the permission of EPA and CARB, FCA US intends to install the same modified emissions software in 2014-2016 MY Jeep Grand Cherokee and Ram 1500 diesel vehicles. FCA US believes this will address the agencies' concerns regarding the emissions software calibrations in those vehicles.

FCA US also believes that these actions should help facilitate a prompt resolution to ongoing discussions with the Environment and Natural Resources Division of the U.S. Department of Justice and other governmental agencies.

FCA US expects that following EPA and CARB approval, owners of the 2014-2016 MY vehicles will be able to receive the software updates at their dealerships. FCA expects that the installation of these updated software calibrations will improve the 2014-2016 MY vehicles' emissions performance and does not anticipate any impact on performance or fuel efficiency.

About FCA US LLC

FCA US LLC is a North American automaker based in Auburn Hills, Michigan. It designs, manufactures, and sells or distributes vehicles under the Chrysler, Dodge, Jeep®, Ram, FIAT and Alfa Romeo brands, as well as the SRT performance designation.
