FCA Canada: FCA Unveils 2021 Dodge Charger and Durango Enforcer Vehicles

- Ordering for the 2021 Dodge Charger Enforcer and Durango Enforcer Vehicles Opens Today
- Production of Charger Enforcer to start in the fourth quarter of 2020; Durango production begins in the first quarter of 2021

September 14, 2020, Windsor, Ontario - Ordering is now open for the 2021 Dodge Charger Enforcer and Dodge Durango Enforcer vehicles, equipped with new transmissions and high-tech options designed to enhance officer safety, responsiveness and fuel efficiency.

“Designed and built based on input from our Police Advisory Board and direct officer feedback, the 2021 Dodge Charger and Durango Enforcer deliver on our promise to offer police agencies the most advanced law-enforcement vehicle lineup in the industry whether as a sedan or a sport-utility vehicle,” said Head of U.S. Sales Jeff Kommor.

2021 Dodge Charger Enforcer

The Charger Enforcer will now offer the TorqueFlite eight-speed transmission on both available powertrain options: the all-new V-6 all-wheel drive (AWD), with increased horsepower and torque, and the legendary V-8 HEMI® rear-wheel drive. These new powertrain combinations meet or exceed the Charger Enforcer’s previous performance profiles in all key categories of acceleration, braking and handling. These improvements are also expected to enable increased fuel efficiency.

Other new standard features include a top speed setting of 225 kilometres per hour (140 mph) with the ability for customers to configure and limit top speed for specific agency needs, electric power steering, Apple CarPlay, Android Auto and an increased Gross Vehicle Weight Rating of 2,495 kilograms (5,500 pounds) to accommodate additional payload.

Production of the Charger Enforcer starts in the fourth quarter at the Brampton (Ontario) Assembly Plant.

2021 Dodge Durango Enforcer AWD

The 2021 Dodge Durango Enforcer will offer more than 20 new features.

Featuring standard all-wheel drive, the 2021 Durango Enforcer is powered by the standard 3.6-litre V-6 Pentastar engine or the optional legendary 5.7-litre HEMI V-8 engine, both mated to the TorqueFlite eight-speed transmission. Other notable available features include an IP-mounted shift lever to free up valuable space in the centre console area, black steel wheels with chrome centre caps, four programmable auxiliary switches and police-specific front seats to accommodate duty belts and enable easier access to seat belt latch points.

“These features, such as the new IP-mounted shift lever, free up valuable space between the front seats to accommodate the police aftermarket equipment needed for the officers to accomplish their jobs,” Kommor said.

Other key features now being offered are the upfit-friendly Vehicle Systems Interface Module, a heavy-duty ‘BR9’ brake package, standard vinyl flooring and a tri-zone climate control system designed with K-9 units in mind. The Durango Enforcer has an available top speed setting of 209 km/h (130 mph) with the ability for customers to configure and limit for specific agency needs.

Production of the 2021 Dodge Durango Enforcer starts in the first quarter of 2021 at the Jefferson North Assembly Plant in Detroit.

FCA Canada

Founded as the Chrysler Corporation in 1925, FCA Canada Inc. is based in Windsor, Ontario, and celebrates its 97th anniversary in 2022. FCA Canada is a wholly owned subsidiary of FCA, a North American automaker based in Auburn Hills, Michigan and member of the Fiat Chrysler Automobiles N.V. (FCA) family of companies. FCA Canada has approximately 440 dealers that sell Chrysler, Dodge, Jeep®, Ram, FIAT and Alfa Romeo products, as well as SRT performance products. The company also distributes Mopar and Alfa Romeo parts and accessories. In addition to its assembly facilities, which produce the Chrysler Pacifica, Chrysler Pacifica Hybrid, Chrysler Voyager and Chrysler Grand Caravan (Windsor) and Chrysler 300, Dodge Charger and Dodge Challenger (Brampton), FCA Canada operates an aluminum casting plant in Etobicoke, a research and development centre in Windsor, and has sales offices and parts distribution centers throughout the country.
